## The course

The course lasts 20 hours online with an approach to the themes: paradigm shift in Chaplaincy, Leadership, Spiritual Intelligence, and Resilience.

Spirituality is no longer seen as a mythical resource or inserted in a system that is only religious. The largest Universities in the World, such as Harvard, Stanford and Yale, every year promote research and specialized, in-depth studies on the behavioral and spiritual quadrants of the Human Being.

Jethro International has fostered these scientific research, resulting in advancement in the field of Spiritual Intelligence as well as the formation of a new model of thinking (MINDSET) and leadership (TRANSCEDENTAL LEADERSHIP).

# Training

The International Chaplain, Civil Diplomat and Humanitarian, can act in 3 (three) fundamental aspects in the support of society:

1. Citizenship: Jethro International has enabled its Chaplain Leaders to establish themselves locally with legal framework support; with Authority and Legitimacy in Society (hospitals, prisons, schools, community in general, social intervention entities, others); effectively intervening through the instrumentalization of its Institutional “Seal” and using its accreditation resulting from the various International Conventions in which it fits.
